

## Ford Transit - Network Rail Mess Van - 1/72 (OO) Scale

Cararama Ford Transit in 1/72 (OO scale) in this striking **Network Rail Mess Van** livery.

This is a code 3 model, modified and finished to a high standard with a detailed interior, side mirrors, highly detailed wheels, 'Transit' logo on side doors, windscreen wipers, clear glass head lamps and rear lights etc.

These vehicles are used by Network Rail to transport and support track maintenance crews around the UK's rail network.

Network Rail have been using a larger more pronounced logo on the side of their newer vans and this model is a very close representation of the real vehicle.

Add realism to your own layout with this very realistic Mess Van to maintain your tracks with probably the most realistic model of this real vehicle available anywhere.

Compare the model images above to the real Transit van image to the right (apologise for the poor phone camera image taken from a distance, but you can see the quality of the model it is based upon).

This model looks superb and very realistic on any modern OO/HO Railway as a trackside feature beside any part of the track or just parked up in the depot!

Click on the images above and take a closer look at the model

### Vehicle Modifications

- Highly realistic Network Rail livery with the decal colours as per the real vehicles.
- The new later design, Network Rail large logos on both rear side panels and across the rear doors with smaller logos on the front doors and bonnet logos.
- Highly realistic full size windows with interior detail in the side panels either side.
- 'Transit' logo on side front doors and rear near side door, Ford badge on off-side door.

Only one Network Rail - Transit Mess van model (generally in the centre of image) is included, all other scenery, people, track, locomotives, vehicles etc shown in the pictures are NOT included.

Please note that this model is the Network Rail Mess Van version and not the standard Network Rail or Site Office (smaller sliding side windows) model that we also have available.

This is not a toy.

**Scale Vehicles**  
for Model Railways

1/72 - 1/87 scale

For recommended age of 12 or over

Supplied screw mounted inside original card display box

**Please note:**

Being a die cast metal model, it is not recommended to be placed onto a track that is or could be electrified as this may short circuit and cause damage to your equipment.

Due to the modifications made to this model, the number of small parts and added transfers, and general delicate construction of the code 3 parts, this model is Not recommended as a toy for children. It is purely for use as a scenic feature for a model railway under adult supervision.
